Should Fix:

Consider Fixing:

### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <https://cdn.ampproject.org/v0.js> (50 minutes)
- <https://pagead2.googlesyndication.com/pagead/js/adsbygoogle.js> (60 minutes)

# Mobile

## Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 981B (12% reduction).

- Minifying <http://ibpsbi.in/amp/> could save 981B (12% reduction) after compression.

## Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 14.2KiB (31% reduction).

- Compressing <http://ibpsbi.in/wp-content/uploads/2017/04/dena-bank-po-admit-card-150x150.png> could save 7.1KiB (32% reduction).
- Compressing <http://ibpsbi.in/wp-content/uploads/2017/04/boi-recruitment-2017-150x150.png> could save 7KiB (31% reduction).

## Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- None of the final above-the-fold content could be rendered even with the full HTML response.

## 5 Passed Rules

### Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

### Enable compression

You have compression enabled. Learn more about [enabling compression](#).

### Minify CSS

Your CSS is minified. Learn more about [minifying CSS](#).

### Minify JavaScript

Your JavaScript content is minified. Learn more about [minifying JavaScript](#).

### Eliminate render-blocking JavaScript and CSS in above-the-fold content

You have no render-blocking resources. Learn more about [removing render-blocking resources](#).

## User Experience

## 5 Passed Rules

### Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

## Mobile

### Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

### Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

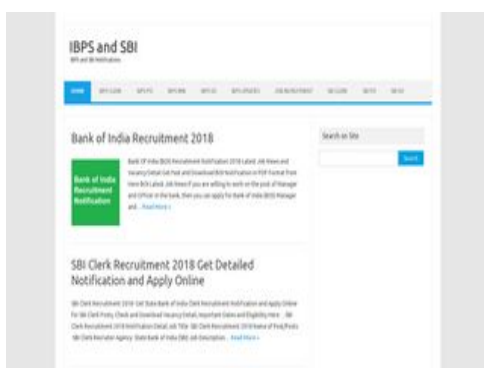

### Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about [sizing tap targets appropriately](#).

### Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).

## Desktop

91 / 100 Speed

! Consider Fixing:

### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://pagead2.googlesyndication.com/pagead/js/adsbygoogle.js> (60 minutes)

### Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <http://ibpsbi.in/wp-content/cache/min/1/2d587c36000544d7a74af7d01a60d946.js>

[Optimize CSS Delivery](#) of the following:

- <http://fonts.googleapis.com/css?family=Ubuntu:400,700&subset=latin,latin-ext>
- <http://ibpsbi.in/wp-content/cache/min/1/e7c8dec3d52435e7313b9c0837798f22.css>

### Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 2.7KiB (42% reduction).

## Desktop

- Compressing <http://ibpsbi.in/wp-content/uploads/2017/04/boi-recruitment-2017.png> could save 1.4KiB (42% reduction).
- Compressing <http://ibpsbi.in/wp-content/uploads/2017/04/dena-bank-po-admit-card.png> could save 1.3KiB (42% reduction).
